Personal statement

I finished Craft Academy boot camp where I learned to be a full stacked developer, learning Ruby, JavaScript, HTML CSS, agile methods, scrum, test driven development and behaviour driven development and project design.

I am solution oriented and work well under pressure

Core skills

- Ruby, RoR, JavaScript, HTML and CSS
- Agile methods, scrum and TDD/BDD
- Working knowledge of Ionic and Angular
- Cucumber, Rspec, Jasmine, Mocha and Chai
- Continuous Integration and Continuous Deployment
- Version control using Git and GitHub
- Pair programming

Projects

FoodHub

(Final project in Craft Academy boot camp)

Course final project, where we advanced our mid-course project which is a recipe sharing social platform, where it is possible to fork recipes from users make their own changes and repost them.

Duties

- Design sprint
- User authentication

- Design sprint
- User ability to:
 - fork a recipe
 - create recipe book
 - create Pdf from the recipe book

News Room

(Project in Craft Academy boot camp)

We got three weeks to create a news platform where we needed to incorporate subscription, multi-language support, user roles and administration amongst other things.

Duties

- Setup github repo for the project
- Setup Rails and CI
- Rspec for unit testing the backend
- Cucumber for acceptance testing the frontend
- Design sprint
