## Personal statement

I just finished Craft Academy boot camp where I started my journey to become a full stacked developer, learning Ruby, JavaScript, HTML CSS, agile methods, scrum, test driven development and behaviour driven development and project design.

I am solution oriented, work well under pressure and thorough.

## Core skills

- Ruby, RoR, JavaScript, HTML and CSS
- Agile methods, scrum and TDD/BDD
- Working knowledge of Ionic and Angular
- Cucumber, Rspec, Jasmine, Mocha and Chai
- Continues Integration and Continues Deployment
- Version control using Git and GitHub
- Pair programming

## Projects

### FoodHub

*(Final project in Craft Academy boot camp)*

Course final project, where we advanced our mid-course project which is a recipe sharing social platform, where it is possible to fork recipes from users make their own changes and repost them.

### Duties

- Design sprint
- User authentication

- Elastic-search
- User ability to:

  - fork a recipe

  - create recipe book

  - create Pdf from the recipe book

**News Room**

*(Project in Craft Academy boot camp)*

We got three weeks to create a news platform where we needed to incorporate subscription, multi-language support, user roles and administration amongst other things.

**Duties**

- Setup github repo for the project
- Setup Rails and CI
- Rspec for unit testing the backend
- Cucumber for acceptance testing the frontend
- Design sprint

## Education

**Craft Academy, Web-Development boot camp**          *(2018)*

***Keilir, Preliminary University Studies***          *(2016-2017)*

## Experience

**City of Reykjavik, Customer service/electronic applications**          *(2008-2010)*

**Rosso Pomodoro Iceland, Restaurant-and staff management**          *(2004-2008)*
